Summary: On June 25, 2024, while responding to flow alarms received from a sensor associated with a 27-inch-diameter vitrified clay pipe sewer in Rancho Palos Verdes, Districts’ staff discovered that the sewer had been damaged due to recent land movement in the area. Due to the severity of the damage, several reaches must be repaired now, as well as additional above-ground sewer piping installed, to ensure the protection of public health and the environment. The Chief Engineer and General Manager will provide an update on the status of the repair.
