County Sanitation District No. 20
of Los Angeles County

Directors:

Wastewater Revenue Program for Fiscal Year 2021-22

The agenda for the April 1, 2021 meeting of the Board of Directors of District No. 20 contains an item regarding District's wastewater revenue program. This program requires residential, commercial, and industrial dischargers to pay an annual user charge based upon their use of the Districts' sewerage facilities. Residential, commercial, and small industrial dischargers are covered by the service charge program, which collects user charges on the property tax roll. Large industrial dischargers are required to file surcharge statements and to pay their user charge under the industrial wastewater surcharge program.

SERVICE CHARGE AND SURCHARGE RATES

The service charge rate for the current fiscal year is \$48.90 per month per single-family home (\$586.88 per year). In 2019, the board passed a four-year rate ordinance increasing rates \$11.88 per year. Due to the COVID-19 pandemic, in June 2020 the Directors elected to modify the ordinance to suspend the planned increase to the service charge rate July 1, 2020. At the March 11, 2021 Board meeting, the Directors elected to modify the rate ordinance again to suspend the planned increase to the service charge on July 1, 2021. Industrial wastewater surcharge rates will also remain unchanged.

BUDGETARY OBJECTIVE AND CREDIT RATING

Suspension of the planned rate increase will not result in an immediate impact to the District. However, it may increase the need for future financing of capital projects as well as the cost of financing. In June 2020, Fitch Ratings affirmed the 'AA-' rating for the District. Additionally, they noted that the District's net leverage (the ratio of the agency's debt compared to net revenues) is the primary indicator that could impact future rating. Ratings for the District could be downgraded, resulting in higher borrowing costs, if the net leverage is not below 8.0 over the next 5 years or if there is a stalled or reversed trend of declining net leverage beyond a temporary increase as a result of COVID related economic softness. As a result of the suspended rate increase, it is anticipated that the net leverage ratio for next year will be 9.39. In early 2022, staff will present a recommendation for future rate increases which will include net leverage projections, capital plans, and anticipated impacts on financing costs.

SUMMARY OF REQUIRED FUTURE ACTIONS

At the May 13, 2021 meeting, a public hearing will be held on the proposed Service Charge and Surcharge Ordinances and the revised Service Charge Report, as is required under the California Health and Safety Code in

order for the District to continue to collect the wastewater service charge as a separate line item on the property tax roll.

At the June meeting, a final budget will be presented to the Board for consideration as part of the overall budgetary process, adoption of which will authorize budget appropriations. In addition, the Board must take certain administrative actions that are required of all agencies that receive ad valorem taxes. These include establishing by resolution the amount of the tax levy the District will request from the Los Angeles County Tax Collector and adopting a limit on authorized expenditures of tax proceeds.

Very truly yours,

COUNTY SANITATION DISTRICT NO. 20 SERVICE CHARGE REPORT FOR FISCAL YEAR 2021-22

INTRODUCTION

County Sanitation District No. 20 of Los Angeles County encompasses portions of the city of Palmdale and unincorporated Los Angeles County.

District No. 20 provides wastewater management services for the area described above. The District is responsible for the operation and maintenance of the Palmdale Water Reclamation Plant and the large trunk sewers which convey wastewater to this facility. These services are essential to protect the public health of the people served by the system.

District No. 20 must provide the revenue required to operate and maintain its facilities. The general revenue sources currently available to the District include a pro rata share of the ad valorem (property) taxes, service charges, industrial wastewater surcharges, interest income, contract revenue and reserves. Any surplus will be transferred to designated reserves to meet targeted reserve requirements.

PROPOSED SYSTEM DESCRIPTION

The required supplemental revenue under the Service Charge Ordinance will be allocated among classes of developed parcels of real property on the basis of use of the sewerage system. The revenue derived from the service charge will be used for operation and maintenance and capital costs.

All industrial dischargers in District No. 20 discharging more than 1.0 million gallons per year are required to file a wastewater surcharge statement as prescribed in the Wastewater Ordinance to pay their appropriate share of the costs based on their use of the sewerage system. All other users of the sewerage system, except for contractual and local government users, will pay service charges.

The basic term used to define the service charge is a sewage unit. A sewage unit represents the average daily quantity of sewage flow and strength from a single-family home measured in terms of flow, chemical oxygen demand, and suspended solids. The number of sewage units (SU) per unit of measure shall be determined by the following formula:

$$\text{SU} = A \left(\frac{\text{FLOW}_{\text{avg}}}{\text{FLOW}_{\text{sfh}}} \right) + B \left(\frac{\text{COD}_{\text{avg}}}{\text{COD}_{\text{sfh}}} \right) + C \left(\frac{\text{SS}_{\text{avg}}}{\text{SS}_{\text{sfh}}} \right)$$

where:

A = The proportion of the total operation and maintenance and capital costs required for conveyance, treatment, and disposal of wastewater for the fiscal year which is attributable to flow;

B = The proportion of the total operation and maintenance and capital costs required for conveyance, treatment, and disposal of wastewater for the fiscal year which is attributable to COD;

C = The proportion of the total operation and maintenance and capital costs required for conveyance, treatment, and disposal of wastewater for the fiscal year which is attributable to suspended solids;

FLOW_{sfh} = Average flow of wastewater from a single-family home in gallons per day;

COD_{sfh} = Average loading of COD in the wastewater from a single-family home in pounds per day;

SS_{sfh} = Average loading of suspended solids in the wastewater from a single-family home in pounds per day;

$FLOW_{avg}$ = Estimated flow of wastewater which will enter the sewerage system from a user in gallons per day;

COD_{avg} = Estimated loading of COD which will enter the sewerage system from a user in pounds per day;

SS_{avg} = Estimated loading of suspended solids which will enter the sewerage system from a user in pounds per day.

For fiscal year 2021-22, the proportions of the total operation and maintenance and capital costs attributable to flow, chemical oxygen demand, and suspended solids have been assigned the following values:

A	=	0.3199
B	=	0.3488
C	=	0.3313

The service charge for each sewage unit is determined by dividing the total required supplemental revenue by the total number of sewage units in the District. The service charge for each parcel is determined by multiplying the service charge for each sewage unit by the number of sewage units attributable to the parcel, which in turn, is determined by the class of real property and the sewage unit formula and the flow, COD and SS loadings from Table 1, which shows the corresponding value for each class of real property in District No. 20.

Based upon presently anticipated sources of funds, the service charge rate for fiscal year 2021-22 is \$586.88 per sewage unit. Parcels with significantly lower water usage may be eligible for a reduced rate pursuant to the terms of the Master Service Charge Ordinance of District No. 20 of Los Angeles County.

DESCRIPTION OF PARCELS RECEIVING SERVICES AND IDENTIFICATION OF AMOUNT OF CHARGE FOR EACH PARCEL

All parcels of real property within the 2021-22 Tax Rate Areas as shown in Table 2 are receiving or benefiting from the services and facilities of District No. 20. Additionally, the parcels listed in Table 3, which do not fall within the Tax Rate Areas shown in Table 2, are receiving or benefiting from the services and facilities of District No. 20. Said parcels are more particularly described in maps prepared in accordance with Section 327, Revenue and Taxation Code, which are on file in the office of the County Assessor, which maps are hereby incorporated herein by reference.

All commercial and institutional parcels assessed a service charge based on the Los Angeles County Assessor's current tax roll shall be charged on the basis of not less than one (1.0) sewage unit.

No charge shall be imposed on the owner or owners of any parcels as to which the fair market value of improvements is less than \$1,000 as determined on the basis of the Assessor's current tax roll. This assumption is predicated on the fact that this type of parcel would be a vacant piece of land; however, should subsequent evaluation reveal that the property is not vacant, then an appropriate service charge would be levied.
