

VIRTUAL TOUR

SEE HOW A MODERN TUNNEL IS BUILT

Wednesday, September 28, 2022 • 6:30 PM

Zoom ID: [865 1294 1177](https://us02zoom.us/j/86512941177)

As part of the Clearwater Project, the Los Angeles County Sanitation Districts are building a new 7-mile tunnel to reliably convey cleaned water from the agency's largest wastewater treatment plant to the ocean. This new tunnel will protect local waterways by addressing aging infrastructure.

Russ Vakharia, who is overseeing construction, will take us into the tunnel as it is being built and show the tunnel boring machine, *Rachel*, in action. See first-hand how the tunnel construction is proceeding and where *Rachel* is along the 7-mile alignment.

For more information about the Clearwater Project, visit our website www.clearwater.lacsd.org or contact Glenn Acosta, Senior Engineer, at gacosta@lacsd.org.
